## Tenneco Opens Clean Air Facility In Lansing

August 04, 2016

Tenneco announced today the opening of a new Clean Air manufacturing plant in Lansing, Michigan, to support General Motors and its crossover vehicle platform.

The 70,000-square foot facility, which opened June 5, is responsible for sequencing exhaust assemblies (which are manufactured at Tenneco's Litchfield, Mich. plant) for the GMC Acadia, Buick Enclave, and Chevrolet Traverse models that are assembled at GM's Lansing plant.

"Tenneco is proud to support General Motors through our new facility in Lansing and we are dedicated to providing the highest quality products and excellent customer service," said Mike Seurnyck, Tenneco vice president and general manager North America Clean Air.

Tenneco operates 64 Clean Air manufacturing facilities throughout the world, including 15 in North America, manufacturing Clean Air aftertreatment technologies and systems. Its Clean Air global engineering centers in Grass Lake, Michigan, Edenkoben, Germany, and Kunshan, China support the design, testing and development of advanced systems for light vehicle and commercial truck and off-highway applications as well as locomotive, marine and stationary engine customers throughout the world.

### About Tenneco
